

Digital Dentistry is radically transforming the way of being a dentist.

A real **Digital Dentist** needs to know the secrets that each work phase hides: from scanning to design, up to production and clinical application.

Through an innovative **mathematical** approach, Prof. Francesco Mangano will guide the participant to fully understand all the clinical and laboratory phases, and the errors to be avoided, to optimize clinical results, and win the digital **dental challenge**.

Prof. Francesco Mangano is one of the leading experts in Digital Dentistry worldwide. He is one of the founders of the Digital Dentistry Society (DDS) International, member of the Board of Directors (2022-23) and President Elect (2024-25). He is the scientific Editor of the Digital Dentistry Section of the Journal of Dentistry, an Elsevier peer-reviewed international journal Q1, with high impact factor (4.4) and citescore (7). He is a speaker at major international conferences and author of 145 Pubmed publications (Scopus h-index 38). He is in private practices in the beautiful little village of Gravedona, on the lake of Como, where he devotes himself exclusively to Digital Dentistry.

Program of the Course

04-05/04/2024. #SCAN!

Accuracy in 3D data acquisition: intraoral and face scanners, digital condilography, cone beam computed tomography, artificial intelligence, augmented reality.

06/04/2024. #PLAN!

Accuracy in 3D planning with computer-assisted-design (CAD) software: guided implant surgery and digital prosthodontics.

07-08/04/2024. #MAKE!

Accuracy in milling and 3D printing with SLA and DLP 3D Printers.

*The Course will be mainly practical, with several hands-on sessions on patient and/or centered on the use of software and hardware

Location

The Course will take place in the Dental Clinic and Digital Lab of the Mangano Digital Academy, in the lovely touristic village of Gravedona, located on the lake of Como, Italy.

Attendance is limited to 8-10 participants.
The Course has a cost of 4000 eur + VAT.
